	30	1 1/4"							
	32								

(*) - Tested by RINA (except UFS 32 – 360).

- Safe Working Load = 0,5 x Breaking Load.

- UFS selection should be based on the "Max. Anchor Weight". If the "Max. Anchor Weight" is not enough, one size bigger UFS should be selected.

- One size bigger UFS can also be used with the same chain. Therefore one size bigger swivel should be selected for chains such as Grade 70 (G7).

- Custom swivels without the flipping bridge and flipping nub could also be made for symmetrical stockless anchors.

- When noted with the order, modified ULTRA Flip Swivels adaptable to smaller size chains than the listed ones could be made.
